

Appendix G

September 30 Count Process

Frequently Asked Questions

Updated as of June 2020

This document is divided into sections for ease of reference. Click on the appropriate topic to jump directly to that section within this document.

- [Student Enrolment Counts](#)
- [Validation of Enrolment Data](#)
- [List of Ministry Designated Prekindergarten programs](#)

Student Enrolment Counts

1. What are the enrolment and English as an additional language (EAL) entry deadlines?

Enrolment and EAL should be entered by September 17th. This allows schools time to make sure the September 30th enrolment is correct. If divisions need to make corrections after September 30th the division needs to make the correction in the school division's system, the student data system (SDS), an Excel spreadsheet and the ministry needs to make the change in the September 30th static enrolment snapshot.

2. When should a new student be created?

Students should only be created if they are new out of province students who have never been in Saskatchewan before or students who have never been in Prekindergarten or Kindergarten before. If a student has been in a Saskatchewan school before, you should not create a new student. If the student cannot be found, call Student and Educator Services at 306-787-6012 so they can conduct a more detailed search. It is important to keep the student's enrolment history intact.

3. What is the definition of a base (Primary) enrolment versus a non-base (Secondary) enrolment?

Base enrolment (Primary) – is where the student receives his/her program and counselling – the physical or virtual location in which the majority of the student's time is spent. Base (Primary) enrolments are "counted" for funding purposes.

Non-base enrolment (Secondary) – delivers a part of a student's program, generally through an agreement with the student's base school and/or school division, conseil des écoles franciskoises or education authority. That agreement may or may not include a fee for service component.

4. What is the difference between a Saskatchewan Resident and a Non-Saskatchewan Resident?

Please reference the *Student Enrolment As It Relates To Residency & Tuition Status* for resident and tuition questions.

5. Who registers home-based students?

The school division or conseil des écoles francosaskoises is responsible for registering home-based students and the school division / conseil des écoles francosaskoises becomes their “school” of record.

6. Do Prekindergarten students need to be enrolled by September 30th?

Yes, all students, including Prekindergarten students must be enrolled by September 30th.

7. What does Ministry-designate mean for Prekindergarten Students?

Ministry-designate identifies all students who are enrolled in a designated Prekindergarten program that receives funding through the Ministry of Education Prekindergarten Program. Prekindergarten students who are not in a designated program are referred to as Other PreK/Preschool programs and supports for three and four year old students. A list of Ministry-designated Prekindergarten programs is provided at the end of this document.

8. How should Early Entrance students be enrolled?

Early Entrance students should be enrolled in Prekindergarten even if they are physically in a different grade. If they are not in a ministry-designated Prekindergarten class then ministry-designated should be set to no.

9. How should immersion students be enrolled?

There are two different areas on the student enrolment record that identify a student as an immersion student.

- Program Enrolment determines the program the student is enrolled in according to The Registrar’s Handbook .
- Immersion Type identifies students receiving instructional time of at least 50% in Cree, Ukrainian, or French.

10. What is the cut-off date for students turning 22 years of age?

A student is counted as being under 22 as long as that student is under 22 years of age on September 30th of the school year. Students identified as +22 are students who are 22 years old or older as of September 30th.

11. If a student under age 22 attends classes at a college in order to complete high school credits and the school division and the conseil des écoles francosaskoises pays for those classes, how should this student be enrolled?

A student attending a provincial school and receiving some programming through a college will be enrolled as base in the provincial school and non-base in the college.

A student attending 100% of the time in a college program will be enrolled as base in the regional college and will be reported by the school division and the conseil des écoles francosaskoises through the NIPA application.

School divisions and the conseil des écoles francosaskoises utilizing college programs for secondary program delivery for students below age 22, as of September 30, are encouraged to maintain close communication relationships with the colleges in order to support the accuracy of the enrolment process.

12. How do we enrol students whose needs are being served by Custody schools?

Custody schools are responsible for enrolling students who are attending their school.

13. How will the student data be reconciled on October 1st?

There are two parts to the reconciliation process:

- A) The Student Data System (SDS) is a live data system and if there are corrections to be made to information in the SDS, schools, school divisions and the conseil des écoles fransaskoises are to follow their regular procedures for updating that information. This process is supported by your school division or the conseil des écoles fransaskoises SDS Support and by Student Services. For SDS assistance phone 306-787-6012.
- B) The snapshot of data used by the Education Funding branch is static as of 4:00 p.m. on September 30th. Any discrepancies will be looked at on a case by case basis by the Education Funding branch. Any discrepancies should be recorded on the Directors Verification Report and sent back to the Education Funding Branch before October 6th, 2020. All discrepancies will be finalized by October 16th.

14. Can mass re-enrolment still be used? And, if yes, when should this begin?

Yes, mass re-enrolment can still be used. The school year runs from August 1st to July 31st. Enrolments entered after August 1st will fall in the 2020-21 school year.

15. How should student enrolments on September 30th be handled?

Enrolling students on September 30th should only happen if the student is coming from another school and is in attendance at your school on September 30th. By September 30th there should be no missing students unless another school enrolled one of your students. If that happened, it is best to contact the other school and determine where the student should be enrolled.

Enrolment as of September 30th is a hard cut off: if a student starts on October 1st they are not counted, if a student leaves on October 1st they are counted.

Validation of Data

1. How will the school divisions and the conseil des écoles fransaskoises be able to validate student enrolment data?

A set of reports to support data validation has been developed both in the SDS web application and the Discoverer reporting tool. These validation reports provide schools, school divisions and the conseil des écoles fransaskoises with the resources/tools to identify issues with their enrolment data prior to the September 30th enrolment count. This is anticipated to reduce the time required to validate the September 30th data as the reports identify issues that will need to be addressed in the validation process. Enrolment summary reports and an in/out report have been developed for student enrolment validation. A verification signoff report and a detailed enrolment report will be sent to the Directors for final verification.

Discoverer reports do not affect SDS performance, they run from a separate reporting area updated daily at 5:00 p.m., any changes made to SDS will not be reflected in Discoverer until after the 5:00 p.m. update. Discoverer enrolment data validation reports are:

SDS – SD Preliminary Data Check Enrolment - Detail Report for School Divisions

- This report has four worksheets:
 - The first worksheet, “Student Enrolment Summary”, shows the counts of students by school for various categories, such as gender, resident type, tuition source and immersion type.

- The second worksheet, “Student Enrolment Detail – Including Inactive”, is a detailed version of the first worksheet which helps identify a student record that needs to be corrected. This worksheet includes inactive student enrolments as well as active student enrolments.
- The third worksheet, “EAL Students Summary Report”, shows the proficiency level of EAL students by school.
- The fourth worksheet, “EAL Students Detail Report”, shows the proficiency level of EAL students by student number and school.

SDS – SD Preliminary Data Check Enrolment – Home-based

- This report has one worksheet, “Home-based Students”, which lists all home-based students along with details such as grade and type of residency. A “Check” column looks for potential issues such as home-based students who are non-Saskatchewan residents or enrolled in Prekindergarten.

SDS – SD Preliminary Data Check Enrolment – Immersion

- This report has five worksheets:
 - The first worksheet, “French Summary”, shows counts of French immersion students and what school they attend. Check for French immersion students enrolled in schools which are not flagged as immersion schools and non-immersion students in single track French immersion schools.
 - The second worksheet, “French Detail”, is a detailed version of the first worksheet which helps identify a student record that needs to be corrected.
 - The third worksheet, “Ukrainian Summary”, shows counts of Ukrainian immersion students and what school they attend. Check for students who are enrolled in a school which does not offer Ukrainian immersion.
 - The fourth worksheet, “Cree Summary”, shows counts of Cree immersion students and what school they attend. Check for students who are enrolled in a school which does not offer Cree immersion.
 - The fifth worksheet, “Immersion Schools”, shows enrolment counts for all immersion schools. Check for immersion schools with low immersion enrolment, non-immersion students in single track schools and immersion students enrolled in schools with the incorrect immersion flags, e.g. Cree immersion in a French immersion school.

SDS – SD Preliminary Data Check Enrolment – Non-Resident Students

- This report contains three worksheets:
 - The “Summary non-Res” worksheet lists all Non-resident students and their resident type.
 - The “Residents from out of prov” worksheet lists Saskatchewan residents who do not have an address in Saskatchewan
 - The “Summary non-Res2” worksheet lists Saskatchewan residents who have a tuition source. This sheet should be blank.

SDS – SD Preliminary Data Check Enrolment – Prekindergarten and Kindergarten

- This report contains two worksheets:
 - The “Kindergarten” worksheet lists all Kindergarten students, the column Potential K Issue identifies students who may have an incorrect birth date or grade or are homebound.

- The “Prekindergarten” worksheet lists all Prekindergarten students. The “Potential PreK Issue” column identifies students who may have an incorrect birth date or grade or are homebound. Check for PreK students shown as home-based students.

SDS reports use the same resources as the SDS web application, please be judicious in their use and use Discoverer reports whenever possible. SDS enrolment data validation reports are:

Reports / Enrolment Reports / School Division Enrolment Verification

- The School Division Enrolment Verification report only includes base students in the totals, includes totals for tuition students, immersion students, +22 students and EAL students. At the bottom there are totals for home-based, PreK-12, K-12 and Prek-12 including home-based.

Reports / Enrolment Reports / School Enrolment Verification

- The School Enrolment Verification report includes base students in the totals, includes totals for tuition students, immersion students, +22 students and EAL students. At the bottom there are totals for PreK-12 and K-12.

Reports / Enrolment Reports / Student Detail Enrolment Verification

- The Student Detail Verification report includes details on grade, tuition, +22, immersion and gender. At the bottom of the report is a legend showing what the column abbreviations mean. This report can be run for specific grades, tuition types, immersion types, +22 students and gender or a combination of criteria to find specific students in question from the school or school division and the conseil des écoles fransaskoises reports.

Reports / Enrolment Reports / Prekindergarten Student

- The Prekindergarten report shows which students are ministry-designated and which ones are not. Totals at the bottom of the report show total number of students, total number of designated and total number of non-designated.

2. Who is able to have access to Discoverer and is there a limit to the number of individuals in a school division or the conseil des écoles fransaskoises who can have Discoverer access?

School divisions and the conseil des écoles fransaskoises are welcome to have multiple users with access to Discoverer. Please be aware that Discoverer access is only available at the school division and the conseil des écoles fransaskoises level. Individual school user access is not available. There is no limit to the number of Discoverer users; however, school divisions and the conseil des écoles fransaskoises will want to think about privacy and confidentiality in granting wide access to the data in a web-based environment.

3. Who will be responsible for the senior level sign-off and when will that occur?

The Verification Report will need to be signed by the Director and emailed back to the Education Funding Branch before 5:00 p.m. on October 6, 2020. For historical high schools and qualified independent schools, the email with the Verification Report and the checklist will be sent to the Director.

4. How do school divisions and the conseil des écoles fransaskoises validate students who have previously graduated?

Students who previously graduated from Grade 12 will be funded at a different rate. The list and count of students will be provided with the verification report which will be sent to the Director.
