

September 30 Count Process – Frequently Asked Questions

Updated as of August 2014

This document is divided into sections for ease of reference. Student Information System (SIS)-specific questions are dealt with in subsections of the Student Enrolment Counts section. Click on the appropriate topic to jump directly to that section within this document.

- [Student Enrolment Counts](#)
- [Validation of Enrolment Data](#)
- [List of Ministry Designated Prekindergarten programs](#)

Student Enrolment Counts

1. What is the definition of a base school versus a non-base school?

Base school – the school where the student receives his/her program and counselling – the physical or virtual location in which the majority of the student’s time is spent. The base school is where the student is “counted” for enrolment and funding purposes.

Non-base school – a school that delivers a part of a student’s program, generally through an agreement with the student’s base school and/or division or education authority. That agreement may or may not include a fee for service component. The non-base school is where the student is not “counted” for enrolment and funding purposes.

If a student attends two schools on a regular basis, the situation should be brought to the attention of the individual in the school division office responsible for student counts. If that individual is unable to resolve the issue, he or she should contact the Ministry of Education at (306) 787-2793. This should be done as early as possible in the school year, prior to September 30th.

2. What is the difference between a Saskatchewan Resident and a Non-Saskatchewan Resident?

Please reference the Immigration Quick Reference Chart for resident and tuition questions.

3. Who registers home-based students?

The school division is responsible for registering home-based students and the school division becomes their “school” of record.

4. What does Ministry Designate mean for PreKindergarten Students?

Ministry Designate identifies all students who are enrolled in a designated PreKindergarten program that receives funding through the Ministry of Education PreKindergarten Program. PreKindergarten students who are not in a designated program are referred to as Other PreK/Preschool programs and supports for 3 and 4 year old students. A list of Ministry Designated PreKindergarten programs is provided at the end of this document.

5. Do PreKindergarten students need to be enrolled by September 30th?

Yes, all students, including PreKindergarten students must be enrolled by September 30th.

6. How should Early Entrance students be enrolled?

Early Entrance students should be enrolled in PreKindergarten even if they are physically in a different grade. If they are not in a ministry designated PreKindergarten class then ministry designated should be set to no.

7. How should immersion students be enrolled?

There are two different areas on the student enrolment record that identify a student as an immersion student.

- The first one is the Program Enrolment which determines the program the student is enrolled in according to the Core Curriculum Credit Requirements Policy. Information on the Credit Requirements Policy can be found in the Registrar's Handbook for School Administrators (section 2).
- The second area is the Immersion Type. This identifies students receiving instructional time of at least 50% in Cree, Ukrainian, or French. Both the Program Enrolment and the Immersion Type fields need to be specified for immersion students.

8. If a student under age 22 attends classes at a regional college in order to complete high school credits and the school division pays for those classes, how should this student be enrolled?

A student attending a provincial school and receiving some programming through a regional college will be enrolled as base in the provincial school and non-base in the regional college.

A student attending 100% of the time in a regional college program will be enrolled as base in the regional college and will be reported by the school division through the NIPA application. School divisions utilizing regional college programs for secondary program delivery for students below age 22, as of September 30, are encouraged to maintain close communication relationships with the colleges in order to support the accuracy of the enrolment process.

9. How do we enrol students whose needs are being served by Custody schools?

Custody schools are responsible for enrolling students who are attending their school.

10. How will the student data be reconciled on October 1st?

There are two parts to the reconciliation process:

A) The SDS is a live data system and if there are corrections to be made to information in the SDS, schools and school divisions are to follow their regular procedures for updating that information. This process is supported by your school division SDS Support and by Student Records staff, who can be reached at (306) 787-8320.

B) The snapshot of data used by the Education Funding (ED) branch is static as of 5:00 p.m. September 30th. Any discrepancies will be looked at on a case by case basis by the ED branch. Any discrepancies should be recorded on the Directors Verification Report and sent back to the Education Funding Branch before October 6th, 2014. All discrepancies will be finalized by October 24th.

11. Can mass re-enrolment still be used? And, if yes, when should this begin?

Yes, mass re-enrolment can still be used. The school year runs from August 1st to July 31st. Enrolments entered after August 1st will fall in the 2014-2015 school year.

12. What is the cut-off date for students turning 22 years of age?

A student is counted as being under 22 as long as that student is under 22 years of age on September 30th of the school year.

13. When final enrolments are submitted on September 30th, what will later submissions on the same day by other school divisions do to existing enrolments? The most recent enrolment date (not submission date) defines a student's enrolment. Enrolments dated earlier than the most recent enrolment remain stored in the system. The purpose of the period of time between the initial data submission due date of September 17th and the final data submission due date of September 30th is to proactively eliminate issues of dispute. If school divisions have been reviewing their reports closely during the days leading up to September 30th, the only points of disagreement should be students enrolling or withdrawing on September 30th.

14. When a student transfers to a school on September 30th, where is that student counted? The student is counted by the school where he or she is in attendance on September 30th. If a student pre-registers in your school on or before September 30th but only begins attending on or after October 1st, that student should NOT be counted in your September 30th enrolments.

Validation of Data

1. How will the school divisions be able to validate student enrolment data and educator data?

A set of reports to support data validation has been developed both in the SDS web application and the Discoverer reporting tool. These validation reports provide school divisions/schools with the resources/tools to identify issues with their enrolment data prior to the September 30th enrolment count. This is anticipated to reduce the time required to validate the September 30th data as the reports identify issues that will need to be addressed in the validation process. Enrolment summary reports and an in/out report have been developed for student enrolment validation.

Discoverer reports for enrolment data validation are:

SDS – SD Preliminary Data Check Enrolment - Detail Report for School Divisions

- This report has one worksheet, “Details”, which lists every student along with details, such as age, grade, resident type, immersion, EAL etc. It can be used for validating resident type counts, grade counts, etc. A second sheet “EAL” contains EAL details

SDS – SD Preliminary Data Check Enrolment - Home Base

- This report has one worksheet, “Home Based Students”, which lists all home-based students along with details such as grade and type of residency. A “Check” column looks for potential issues such as home-based students who are non-Saskatchewan residents or enrolled in Pre-Kindergarten.

SDS – SD Preliminary Data Check Enrolment – Immersion

- This report has 5 worksheets
 - The first worksheet, “French Summary”, shows counts of French immersion students and what school they attend. Check for French Immersion students enrolled in schools which are not flagged as immersion schools and Non-Immersion students in single track French Immersion schools.
 - The second worksheet, “French Detail”, is a detailed version of the first worksheet which helps identify a student record that needs to be corrected.
 - The third worksheet, “Ukrainian Summary”, shows counts of Ukrainian Immersion students and what school they attend. Check for students who are enrolled in a school which does not offer Ukrainian Immersion.
 - The fourth worksheet, “Cree Summary”, shows counts of Cree Immersion students and what school they attend. Check for students who are enrolled in a school which does not offer Cree Immersion.
 - The fifth worksheet, “Immersion Schools”, shows enrolment counts for all Immersion schools. Check for Immersion schools with low immersion enrolment, Non-Immersion students in Single track schools and Immersion students enrolled in schools with the incorrect immersion flags, e.g. Cree Immersion in a French Immersion School.

SDS – SD Preliminary Data Check Enrolment – Non-Resident Students

- This report contains three worksheets:
 - The “Summary non-Res” worksheet lists all Non-Resident students and their resident type.
 - The “Residents from out of prov” worksheet lists Sask. Residents who do not have an address in Saskatchewan
 - The “Summary non-Res2” worksheet lists Sask. Residents who have a tuition source. This sheet should be blank.

SDS – SD Preliminary Data Check Enrolment – PreK and Kindergarten

- This report contains two worksheets

- The “Kindergarten” worksheet lists all Kindergarten students, the column Potential K Issue identifies students who may have an incorrect birth date or grade or are home-bound.
- The “Pre-Kindergarten” worksheet lists all Pre-Kindergarten students. The “Potential PreK Issue” column identifies students who may have an incorrect birth date or grade or are home-bound. Check for PreK students shown as home-based students.

2. Will the reports be available on the SDS web application or just through Discoverer?

Most of the reports will be available in both applications and are available online anytime. However, we ask that users be judicious in their use of the web application reporting tools and use Discoverer whenever possible during peak times, as generating the reports takes system resources away from the data submission functions. The data refresh to the warehouse that Discoverer uses occurs after 5:00 p.m. nightly; thus, any changes or additions submitted prior to 5:00 p.m. will be visible in the Discoverer reports the following day. If you require up-to-the-minute reports to verify changes to data immediately, you will need to use the reports in the web application.

3. Who is able to have access to Discoverer and is there a limit to the number of individuals in a school division who can have Discoverer access?

School divisions are welcome to have multiple users with access to Discoverer. Please be aware that Discoverer access is only available at the school division level. Individual school user access is not available. There is no limit to the number of Discoverer users; however, school divisions will want to think about privacy and confidentiality in granting wide access to the data in a web-based environment.

4. What documentation will the ministry provide to school divisions to assist them in completing the verification of the data?

The Ministry will provide detailed reports with the verification report to compare with your system.

5. Who will be responsible for the Senior level sign-off and when will that occur?

The Verification Report will need to be signed by the Director and emailed back to the Education Funding Branch before 5:00pm on October 6th, 2014.

For Historical High Schools and Qualified Independent Schools the email with the Verification Report and the checklist will be sent to the Director.
